

The Titan by Jackloc: The strongest and most secure window restrictor in the world

The Titan by Jackloc is our strongest and most secure window restrictor, due to its steel folding mechanism. The restrictor is tested to withstand a force of 4,800 newtons, or the equivalent of five adult males, which exceeds all standard requirements by nearly 10 times.

The Titan provides extra security for open windows and is awarded Sold Secure status by the Master Locksmiths Association, making it the first, and only, window restrictor to achieve this accolade. The restrictor can fit most window sizes and types, including uPVC, Timber and Aluminium.

The ability to dis-engage the restrictor with a key, provides flexibility to allow the window to be fully opened if required. The product comes with hardened and zinc coated, grade 4 security clutch screws and comes with a 10-year guarantee.

Key Features:

First and only window restrictor to achieve Sold Secure status by the Master Locksmiths Association
