High Performance Weatherseals for Windows & Doors

Key Performances

Temperature Range: -40°C to +70°C.

Compression Set: <15%

UV Stability: 5000 hrs QUV tester. UVB 313 bulb.
(4hrs light / 4hrs dark cycle)

Materials

Outer skin. Polyethylene.

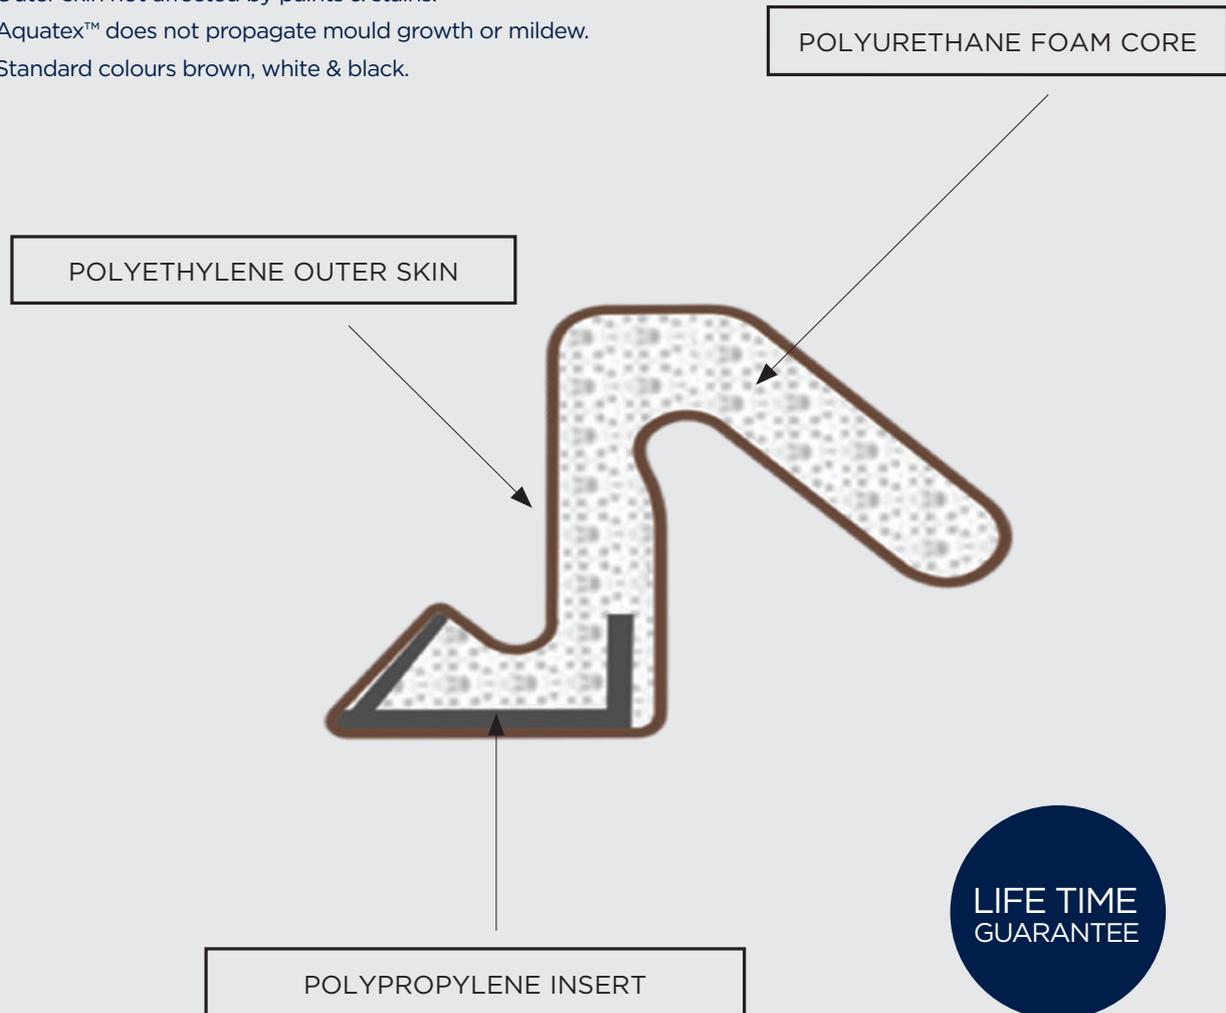

(Properties include: inert, low friction, UV stable, colour options)

Foam Core. Polyurethane. (Properties include: excellent memory over extended temp range)

Inserts. Polypropylene (Properties include: longitudinal stability and secure fixing)

Features

- P.U. foam core provides excellent recovery after long-term deflection.
- Working temperature range -40°C to +70°C
- Thicker polyethylene outer sheathing improves resistance to wear & tear.
- Deflection ranges to cope with tolerance & seasonal movement of seal gap.
- Excellent UV stability.
- Outer skin not affected by paints & stains.
- Aquatex™ does not propagate mould growth or mildew.
- Standard colours brown, white & black.

Aquatex A15

Seals gaps 9 - 15mm

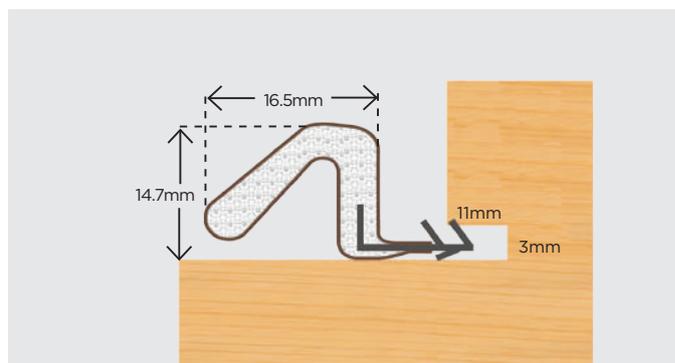

Conforms to BS 12365-12003

Classification W72560

2.1m Lengths, 125L/Box

Available in white, brown & black

Ref: 1.27.0065

Aquatex A14

Seals gaps 10 - 15mm

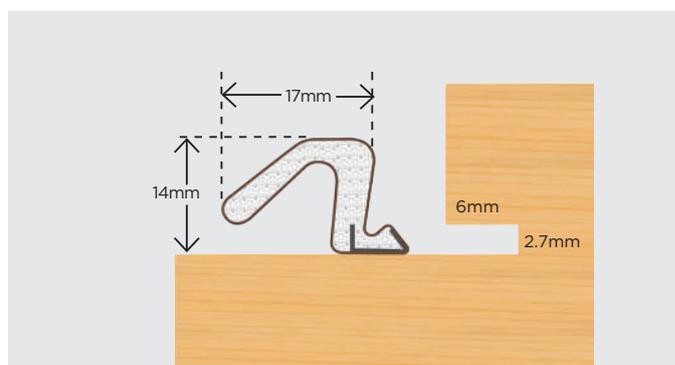

Conforms to BS 12365-12003

Classification W72560

2.1m Lengths, 150L/Box

Available in white, brown & black

Ref: 1.27.0189

Aquatex A13

Seals gaps 5.5 - 12mm

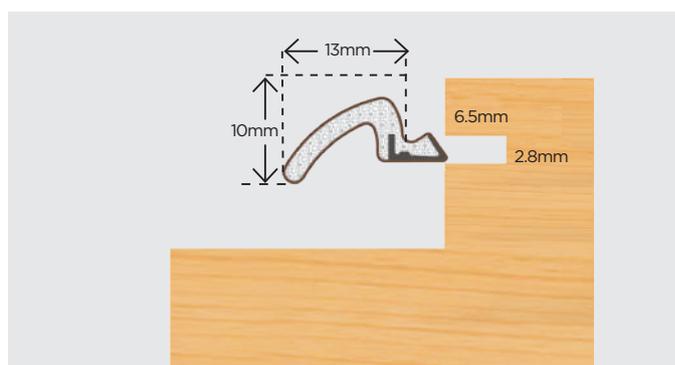

Conforms to BS 12365-12003

Classification W62560

350m/Box (2 x 175m)

Available in white, brown & black

Ref: 1.28.0700

Aquatex A10

Seals gaps 4.5 - 8mm

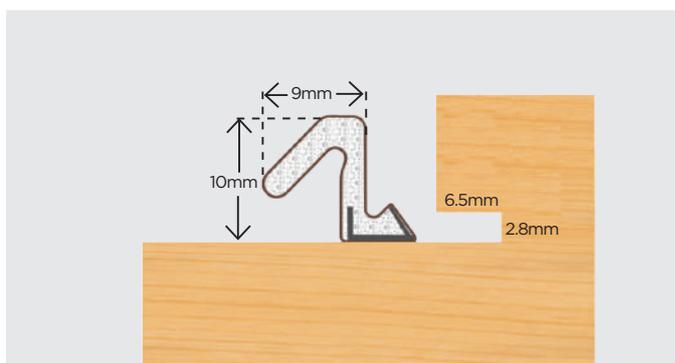

Conforms to BS 12365-12003

Classification W32560

10m, 25m, 100m, 500m/Box (2 x 250m)

Available in white, brown & black

Ref: 1.27.0021

Aquatex A9

Seals gaps 6 - 11.5mm

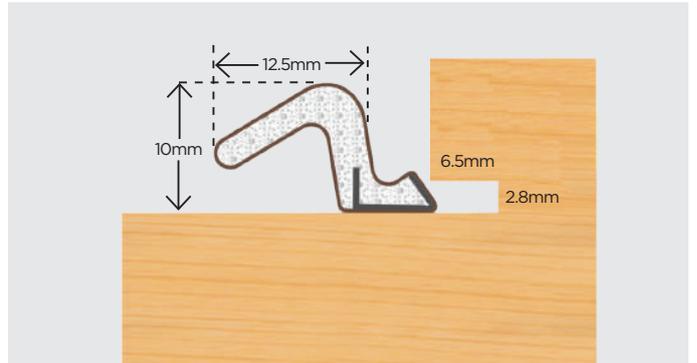

Conforms to BS 12365-12003

Classification W52560

400m/Box (2 x 200m)

Available in white, brown & black

Ref: 1.27.0569

Aquatex A5

Seals gaps 4 - 8.5mm

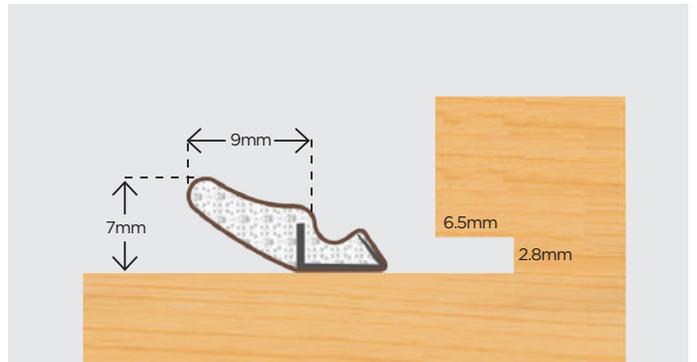

Conforms to BS 12365-12003

Classification W43560

600m/Box (2 x 300m)

Available in white, brown & black

Ref: 1.27.0562

Aquatex P3

Seals gaps 4 - 6.4mm

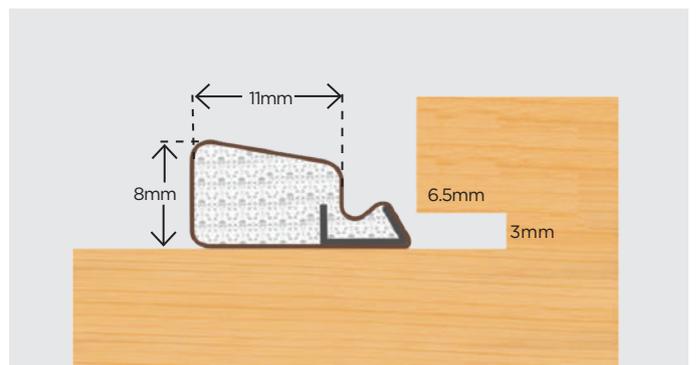

Conforms to BS 12365-12003

Classification W26560

400m/Box (2 x 200m)

Available in white, brown & black

Ref: 1.27.0033

Aquatex P6

Seals gaps 4 - 6mm

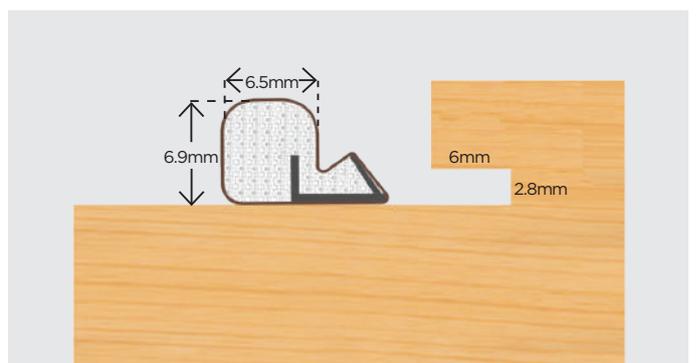

Conforms to BS 12365-12003

Classification W23560

600m/Box (2 x 300m)

Available in white, brown & black

Ref: 1.27.0063

Aquatex P8

Seals gaps 2 - 3.5mm

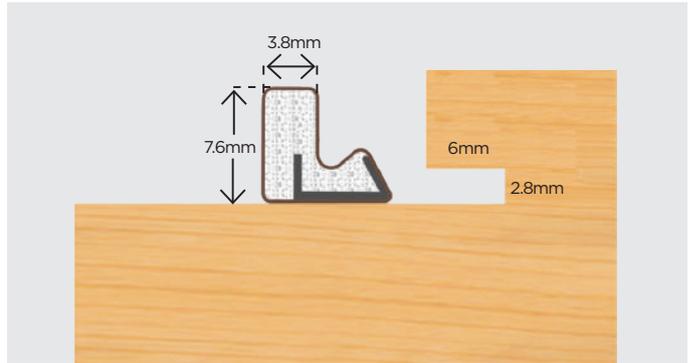

Conforms to BS 12365-12003

Classification W15560

10m, 25m, 100m, 700m/Box (2 x 350m)

Available in white, brown & black

Ref: 1.27.0048

Aquatex P9

Seals gaps 2.8 - 4.5mm

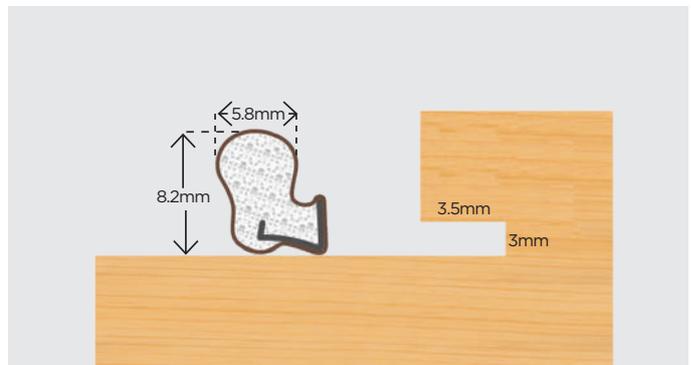

Conforms to BS 12365-12003

Classification W15560

600m/Box (2 x 300m)

Available in white & black

Ref: 1.27.0154

Aquatex P10

Seals gaps 3.5 - 5.5mm

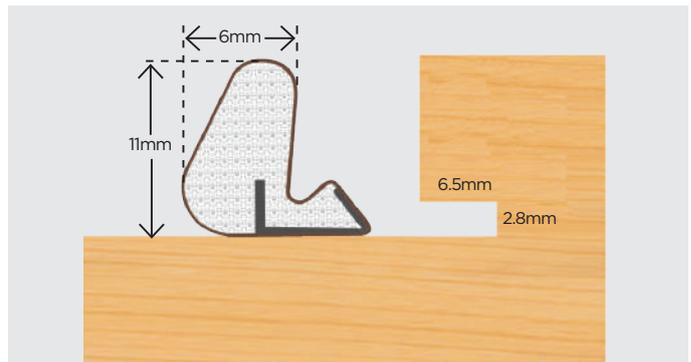

Conforms to BS 12365-12003

Classification W45560

500m/Box (2 x 250m)

Available in white, brown & black

Ref: 1.27.0484

Aquatex P11

Seals gaps 4.5 - 6mm

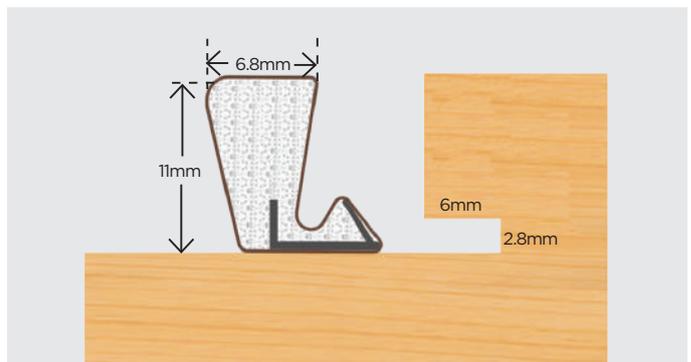

Conforms to BS 12365-12003

Classification W35560

10m, 25m, 100m, 500m/Box (2 x 250m)

Available in white, brown & black

Ref: 1.27.0109

Aquatex S20

Seals gaps 5 - 7.5mm

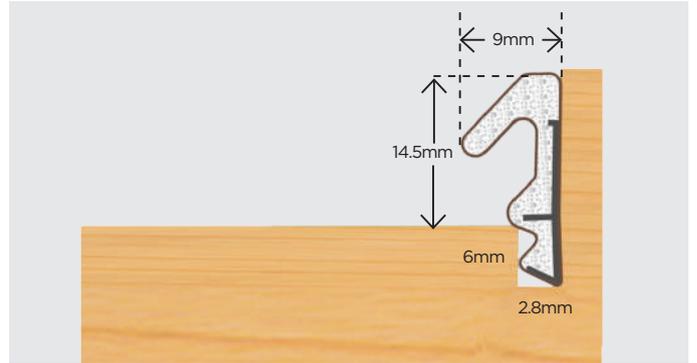

Conforms to BS 12365-12003

Classification W43560

250m/Box (2 x 125m)

Available in white, brown & black

Ref: 1.27.0124

Aquatex S21

Seals gaps 5 - 8mm

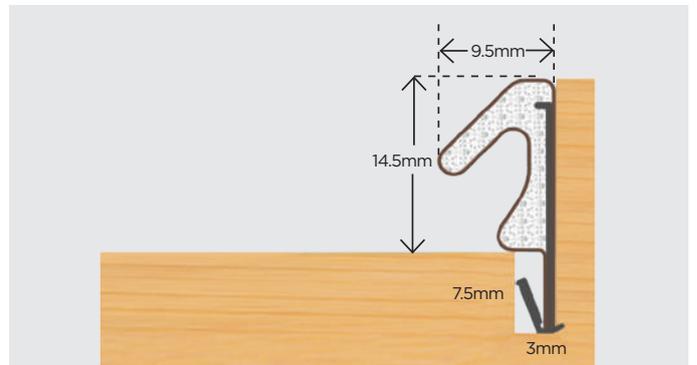

Conforms to BS 12365-12003

Classification W33560

300m/Box (2 x 150m)

Available in white, brown & black

Ref: 1.28.0091

Aquatex S22

Seals gaps 5 - 8mm

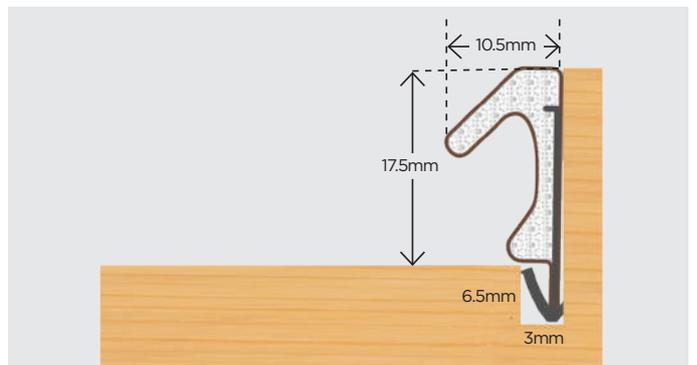

Conforms to BS 12365-12003

Classification W33560

300m/Box (2 x 150m)

Available in white, brown & black

Ref: 1.27.0310

Aquatex S25

Seals gaps 5 - 6.5mm

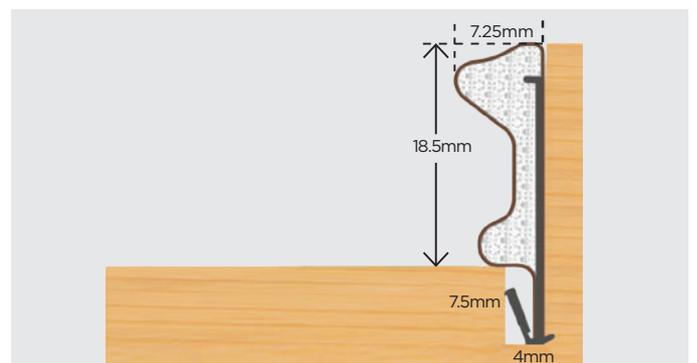

Conforms to BS 12365-12003

Classification W34560

200m/Box (2 x 100m)

Available in white, brown & black

Ref: 1.28.0097

Aquatex D Slot 4.8mm x 5mm

Seals gaps 3.5 - 4.8mm

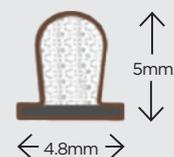

Conforms to BS 12365-12003

Classification W14560

1220m/Box (2 x 610m)

Available in white, brown & black

Ref: 1.28.0069

Aquatex D Slot 4.8mm x 6.5mm

Seals gaps 4.5 - 6mm

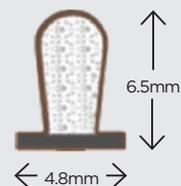

Conforms to BS 12365-12003

Classification W24560

900m/Box (2 x 450m)

Available in white, brown & black

Ref: 1.28.0070

Aquatex D Slot 4.8mm x 7.5mm

Seals gaps 5.5 - 7mm

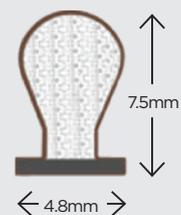

Conforms to BS 12365-12003

Classification W23560

600m /Box (2 x 300m)

Available in white, brown & black

Ref: 1.28.0071

Aquatex D Slot 4.8mm x 9.5mm

Seals gaps 6.5 - 9 mm

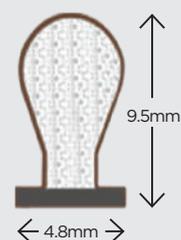

Conforms to BS 12365-12003

Classification W24560

600m/Box (2 x 300m)

Available in white, brown & black

Ref: 1.28.0072

Double Sided PVC Security Glazing Tape

Specification

Our high security PVC glazing tape is closed cell, compressible, high density PVC coated with pressure sensitive moisture resistant solvent acrylic adhesive protected by a siliconised paper liner approved to BS 7950 (1997).

We offer a range of thicknesses & widths. The width should match the rebate/upstand height. We recommend a minimum of 10mm contact width to the frame but the greater the width the better the performance. Always ensure a clean & dry surface with the tape aligned to the top of the rebate without being stretched. Butt, or mitre corners & immediately prior to glazing remove the protective siliconised release paper. Our security PVC glazing tape is recommended to be used under 20% compression in order to maintain a water tight seal.

Thickness (mm)	1	1.5	2	3	4	5	6

Double Sided Tapes

Georgian Bar Tape

- A** Siliconised paper or filmic liner
- B** Crosslinked PE foam
- C** Pressure sensitive acrylic adhesive

Thickness (mm)	1	1.6	2
----------------	---	-----	---

Roll Length (m)	50	46	46
-----------------	----	----	----

Specification

A high tack acrylic adhesive tape offering a good balance of peel & shear performance with excellent environmental resistance. The product has been designed for both internal & external applications.

The foam is a high quality Polyolefin with a high degree of colour stability & excellent key to the adhesive surface. The thickness & density range has been chosen to offer a conformable product for uneven, irregular or contoured materials.

The acrylic adhesive has good weathering & chemical resistance properties.

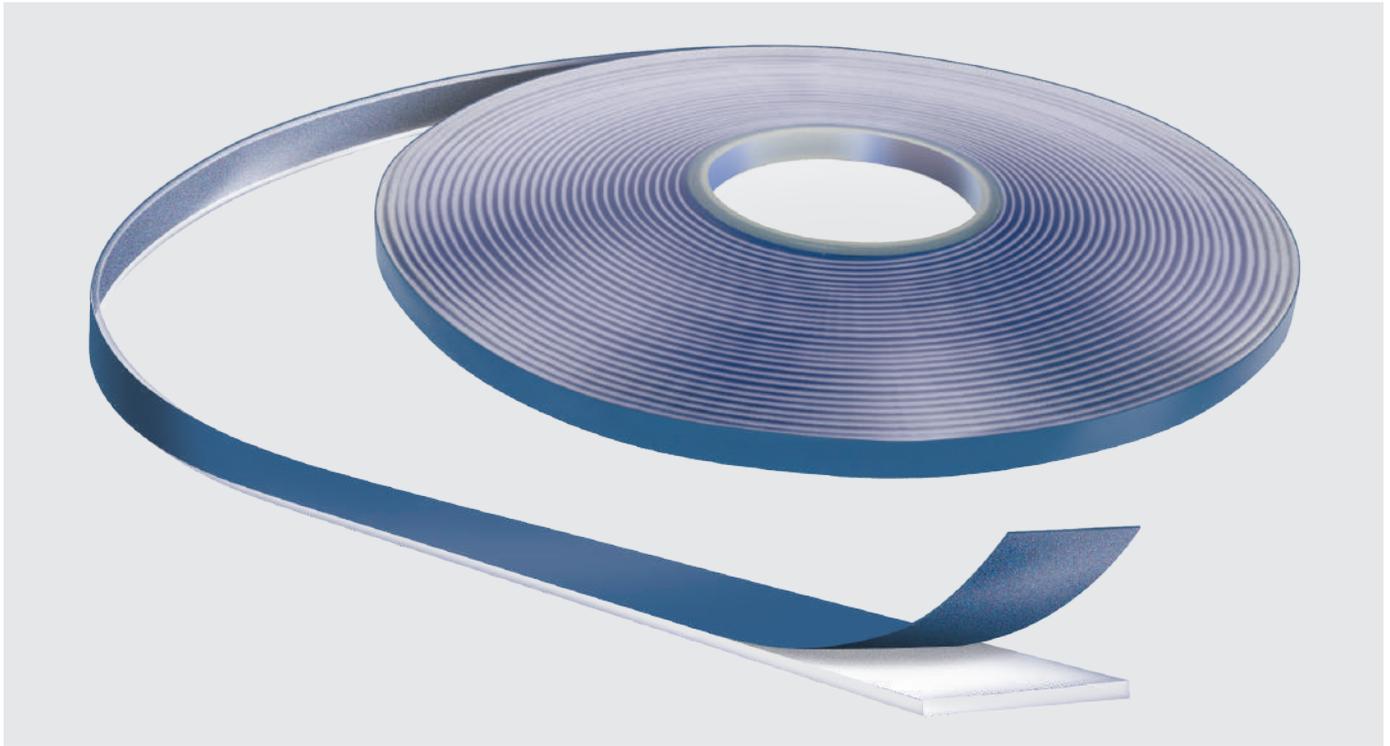

Available in black & white as a double sided tape in thicknesses 1mm, 1.6mm & 2mm protected by a siliconised paper liner in a range of widths.

Storage

- Store in dry conditions & apply between +10°C and +35°C
- Shelf life 1 year

Clear Acrylic Bonding Tape

Unique Attributes

- Easy release liner
- Clear Tape
- Very high bond strength
- Solid acrylic core
- Good quick stick
- Distributes shock

Thickness (mm)	1	1.5	2	3
----------------	---	-----	---	---

Roll length (m)	33	33	25	12
-----------------	----	----	----	----

Typical Applications

- Security Glass Lamination
- Window and door decoration bars

Specification

Exitex acrylic bonding tape is a clear solid acrylic tape that is virtually invisible after application. Available in 1mm, 1.5mm, 2mm & 3mm thicknesses in a range of widths.

Designed with a solid acrylic core once adhered it will increase in bond strength over time & its performance will enhance with elevated temperature. Exitex acrylic tape has excellent weathering properties.

Instructions

For maximum adhesive performance, prepare the contact surface by removing dirt, wax, soap and oily films with a cleaning solvent. A typical cleaning solvent is a 50 / 50 isopropyl alcohol / water mixture. It may be necessary to seal and/or prime the contact surface.

The greater the adhesive-to-surface contact (known as wet-out), the better the adhesive bond strength. Apply the tape to the first surface with the liner on, & firmly rub down. Remove the liner just prior to bonding surfaces together and apply firm pressure to ensure full contact. Bond strength is dependent on the substrate surface, application temperature & dwell time. When possible, allow 24 hours dwell time at room temperature before loading.

Posilok End Caps

End Caps available for all sizes of PSL & PWT/17

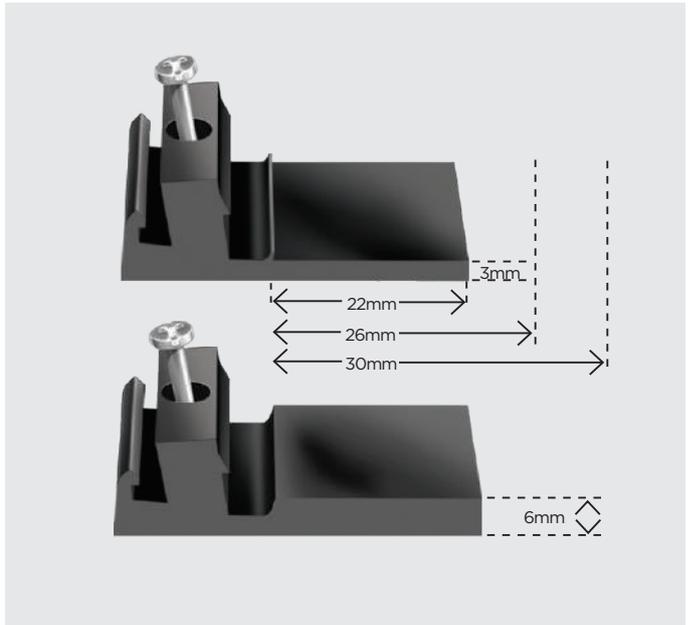

Available in black, brown & white

PSL combined Flat Anchoring & Setting Blocks

Available with 3mm or 6mm platform

To suit 20, 24 & 28mm DGU's

PSL Combined Angled Anchoring & Setting Blocks

To suit 20mm, 24mm, & 28mm DGU's

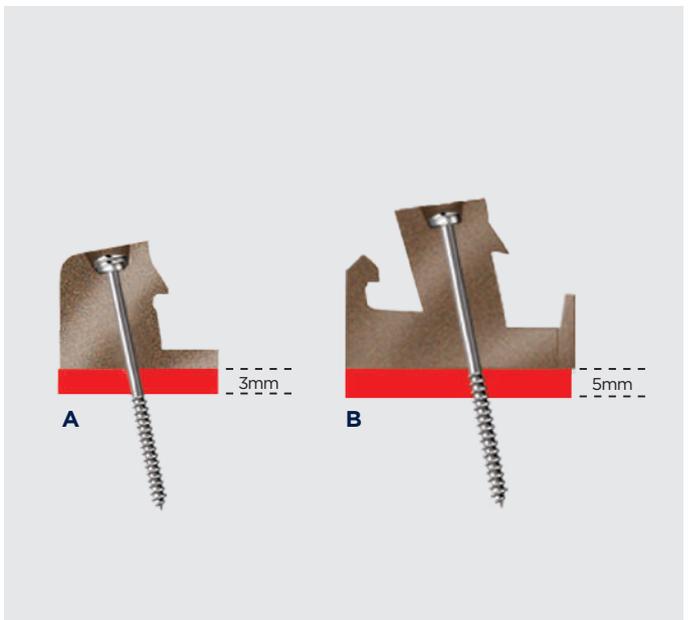

PWT & PSL Fixing & Spacer Blocks

Allows additional clearance & drainage

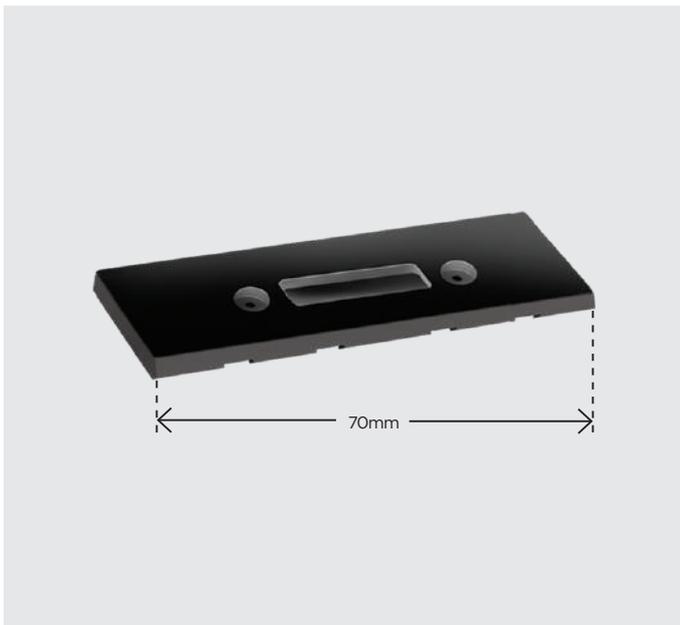

A 3mm flat spacer for PWT

B 5mm flat spacer for PSL

Flat Setting Blocks

Available to suit 20 DGU's

Angled Setting Blocks

Available to suit 14, 20 & 28 DGU's

Tapered Wedge Packers for sides & top

Available to suit 14, 20, 24 and 28 DGU's

Elast-O-Sealant

All weather sealant

Can be applied to wet surfaces

Available in black, brown, white, grey & clear

Intumescent Fire & Smoke Seals for Fire Door Assemblies

Specification

A graphite based intumescent fireseal contained within a PVC carrier.
The seals are self-adhesive & are rebated into either the doorframe or the door edge.
In the event of a fire the seal expands to many times its original volume & seals the gap around the door to provide an effective barrier against the passage of fire, smoke & hot gases.

Exitex Intumescent Fireseals are available with or without a cold smoke seal in the form of a grey nylon pile or a black neoprene rubber draught seal.

Exitex smoke seals provide a permanent barrier to smoke – particularly important as smoke fumes travel faster & further than the fire itself.

They also have acoustic & thermal applications.

Certifire Approved

Tested for 30 minutes with 10mm & 15mm to BS 476 part 22 & 31.1.

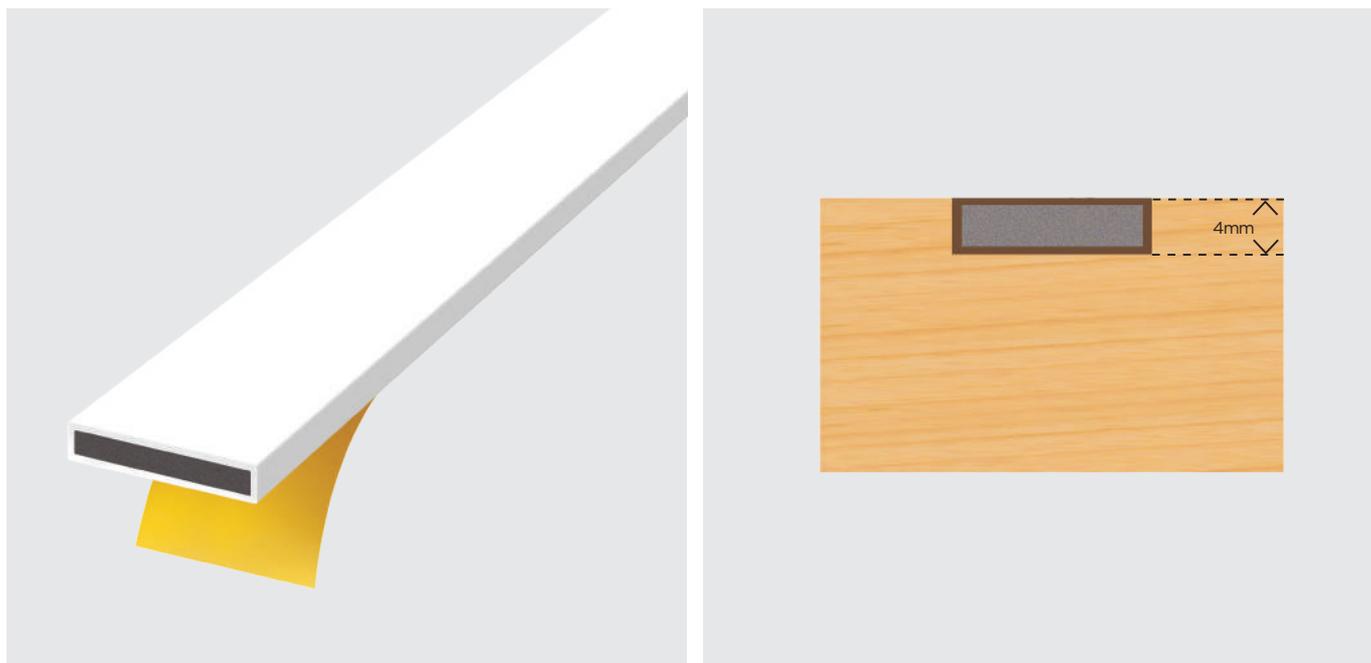

Tested for 60 minutes with 20mm, 25mm & 30mm to BS 476 part 22 & 31.1.

Smoke seals tested to EN1634-3.

Tested to 100,000 open / close cycles.

To seal the bottom of the door please refer to our range of weatherbars in our Weatherbars, Door Surrounds & DIY Products brochure.
