SQUARED PERFECTION

The square is a symbol of order and structure – it speaks to logic and radiates calm. The square is the perfect result of human logic: four equal sides and four equal angles. With their clear design language, squares are increasingly finding their influence in modern architecture. The square product range by Karcher Design reflects this straightforward perfection.

STAINLESS STEEL ROSE-SYSTEM

High quality – durable – secure mounting

solid mounting plate

projecting lugs for correct alignment

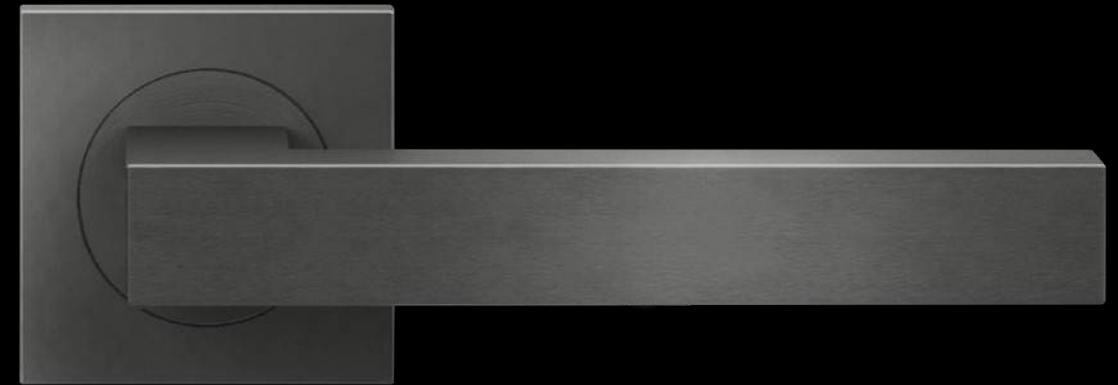

no turning of the rose when
pressing the door handle
