

CABINET KNOBS & PULLS

	Lacquered Polished Brass Warm, with a sense of tradition, this highly polished finish is opulent without being flamboyant.
	Polished Chrome on Brass A bold classic contemporary finish on Solid Brass. The mirror effect reflects light and colours of the surroundings.
	Satin Chrome on Brass The refined brush marks of Satin Chrome will appeal to those who favour a contemporary matt finish.
	Lacquered Satin Nickel on Brass With its honeyed grey tone, created by brushed nickel plating on brass, Satin Nickel is a warmer alternative to Satin Chrome.
	Lacquered Antique Finish on Brass With russet hues and a brass undertone, this variation on brass retains a warm character but adds age and maturity by highlighting a spectrum of shades making each piece both alluring and unique.
	Polished Nickel on Brass With a subtle golden hue, this is a softer alternative to Polished Chrome. Polished Nickel finish is not lacquered and will oxidise naturally and continue to change over time by taking on an aged patina. Regular buffing with a soft cloth will help maintain the bright finish.
	Matt Lacquered Satin Brass A modern alternative to traditional Polished Brass. This attractive brushed texture mellows the colour of Solid Brass and adds warmth and richness to both a traditional and a soft contemporary décor.
	Matt Lacquered Bronze Finish on Brass An aged finish on brass creating a vintage appearance, yet one that also looks outstanding in contemporary schemes. Over time a dual patina of colour will emerge as the Solid Brass is revealed from underneath along any edges that are frequently touched.
	Matt Lacquered Satin Rose Gold Finish on Brass Rose Gold is a traditional alloy used in Jewellery, blending gold with copper to create a delightful rosy red tint. We have replicated a similar appearance by applying a matt Copper plating over Solid Brass. Our Rose Gold finish cabinet hardware adds a touch of warmth and luxury to any furniture.
	Powder Coated Matt Black on Brass A matt black powder coating is applied over Solid Brass to create our distinctive Matt Black contemporary look.

AC	Aged Copper Finish on Brass	Lacquered finish with a Copper undertone.
AN	Aged Nickel Finish on Brass	Lacquered finish with a Nickel undertone.
AB	Aged Brass Finish on Brass	Lacquered finish with a Brass undertone.

BLACK IRON

Solid Bronze Rustic

These products are formed by casting molten Bronze into a sand mould. This process leaves light surface indentations to bestow a weathered appearance, which would complement rustic and period inspired furniture. Over time the bronze colour will lighten along any edges and surfaces that are frequently touched creating a naturally aged appearance as the bronze below is slowly exposed. As this is a living finish, products may not be identical and there may not be slight variation in hue and tone.

PRODUCT CARE

Lacquered Finishes

Many metals suffer from surface tarnishing if left exposed to the atmosphere.

Surfaces can be protected with the application of different protective finishes, such as paint, metal coating or lacquer.

We apply a clear lacquer to our products which forms a protective surface layer; but does not detract from the inherent beauty of the product.

The life of the lacquer can be affected by many environmental or atmospheric conditions, including sea air and industrial pollution.

Polished Brass, Satin Nickel, Antique Brass, Matt Bronze, Satin Brass and Satin Rose Gold are all lacquered finishes.

To help maintain the lacquered finish, we recommend the following: -

- Keep it clean by removing dust or liquids from the surface with a soft non-abrasive cloth.
- Do not use metal cleaners or aerosol sprays as these will damage the lacquer coating.
- Avoid impact with rings, keys and other metallic objects which may damage the lacquer.

With maintenance and by reducing the risk of scratching, the life of the lacquer can be prolonged

SUPPLEMENTARY INFORMATION ON SELECTED FINISHES

Antique Brass

To achieve this distinctive finish, our solid brass products are first oxidised to develop a rich, dark patina. This patina is then carefully removed by hand, partially revealing the warm brass beneath. The result is a unique surface on every piece, with natural variations in colour and tone.

A clear lacquer is applied as the final step to preserve the character and protect the finish.

Please note:- as each piece is finished by hand, subtle variations in appearance are to be expected. These details are part of what makes the finish authentic and full of character.

Matt Bronze

To achieve this distinctive look, our solid brass products are oxidised to develop a rich, dark patina. A clear lacquer is then applied to protect the finish and preserve its unique character.

Over time, the lacquer will gently wear away, revealing the underlying brass. This natural ageing process enhances the charm of each piece, adding depth, warmth, and a character that improves with time.

Black Iron Rustic

By powder coating our iron products we create a Matt Black finish which is both attractive and durable.

As the name suggests this range has imperfections on the surface which are retained to create the rustic appearance. To protect the finish please avoid impact with other metal items and remove dust and water from the surface with a soft non-abrasive cloth.

Polished Chrome and Satin Chrome

Regularly removing dirt and watermarks and buffing with a nonabrasive cloth will help maintain the life of these finishes.

Polished Nickel

Polished Nickel is a "living finish" without a protective coating, meaning it will naturally change over time. It has a highly reflective surface with a warm, mellow yellow tone – offering a softer alternative to the cooler, mirror-like appearance of polished chrome.

The natural surface will react with air and moisture over time, developing a rich patina that gives each piece unique character and timeless appeal. If preferred, the original shine can be restored using a suitable metal polish.

If you prefer a more stable finish that remains unchanged, consider our Polished Chrome – a highly durable, non-tarnishing option with a crisp, bright appearance.

Solid Bronze Rustic

Our Solid Bronze finishes are coated with a wax paste to prevent immediate oxidation.

Both of our Bronze finishes are "living finishes", and therefore as the wax is slowly removed with usage, the bronze below will be exposed to the atmosphere and will start to change colour.

Most visibly the frequently touched areas will lighten with use creating a naturally aged appearance.

Expect this finish to change naturally over time.
