

ALEXANDER & WILKS

Britain's Finest Ironmongery

Issue: 5

ALEXANDER & WILKS

Inspired by legendary British engineers Sir Alexander Issigonis, designer of the original Mini, and Maurice Wilks, creator of the world-famous Land Rover—two of the most iconic designs in history—Alexander & Wilks presents an exclusive collection of unique ironmongery.

Our range combines high-quality craftsmanship with beautifully designed pieces, from timeless traditional styles to the latest CNC-machined, highly polished contemporary finishes. We blend natural and man-made textures to create exceptional hardware.

With expert advice and next-day delivery available.

For help or assistance please call: 01228 587751

Care Instructions

MAINTAIN THE SHINE: CARE INSTRUCTIONS

Metals and Finishes

It's important to keep metals clean, as dust—often chemically active—and moisture, which is sometimes acidic, are natural hazards. Regular, light cleaning is more effective than occasional intense treatments.

Pewter

For pewter, occasionally wash with soapy water, dry thoroughly, and buff lightly to remove any watermarks.

Brass (Unlacquered)

Brass is an alloy of copper and zinc, with copper being the main component. Copper reacts with the atmosphere, producing a natural oxidation (patina) on its surface. Once the patina is fully developed, it protects the metal from further atmospheric damage. The patina is typically a dark green but may show various shades. For maintenance, wash lightly with soapy water and dry thoroughly—this will allow the natural patina to remain. If you prefer a brighter brass look, use Brasso occasionally.

Lacquered Finishes, Plated Finishes and PVD

Regular dusting is recommended. Occasionally, wash with soapy water, dry thoroughly, and buff lightly to remove any watermarks.

Did you Know?

PVD stands for Physical Vapour Deposition

Our products with a 25-year guarantee feature a PVD coating, which creates an exceptionally durable finish.
