FRELAN
HARDWARE

INTRODUCTION

The Valley Forge range is produced using traditional designs and methods with products forged and handcrafted from sheet metal by blacksmiths making each product unique as they are finished individually with delicate hammer marks with each smith leaving their own personal touch.

The range is finished with a pewter patina finish which enhances the texture and colour of the products to produce a range with traditional style and modern functionality adding a unique style and feel to your home.

MAINTENANCE

Whilst the Valley Forge range can be used externally as well as internally they are not suitable for coastal conditions and must be cared for to maintain the original finish. To do so regular wiping with a slightly oiled cloth is recommended to remove any harmful deposits which may accumulate on the products and break down the surface.
