

BLU[®]

316 Marine Grade Stainless Steel Hardware

The Collection

Five Stunning Finishes
Suited Door and
Window Hardware

Edition 04

COASTAL

Shaping the future.

Our Sense of Purpose

The shape of things to come

Perfect Fit Guaranteed

The basis for our
decision making.

Superior Standards Always

The principle behind
our actions.

Ultimate Lasting Performance

The status we want
to achieve.

Born on the rugged shores of Cornwall back in 2003, but opening doors and windows globally, Coastal Group is a family owned business which specialises in the design and manufacture of precision-made hardware solutions for external doors and windows.

We continuously innovate in the design and manufacture of every piece to ensure it enhances the look and improves the performance and durability of the doors and windows they're fitted to.

Consistently. Every time.

Loren Jenner

Managing Director, Coastal Group

BLU® - Your Benefits

DESIGN

Designed to enhance the aesthetics and performance of your external doors and windows and set them apart from your competition.

INNOVATION

We're constantly looking at ways to improve the product offering and performance and create new solutions to meet your needs.

DURABILITY / LONGEVITY

The BLU product range is made from 316 Marine Grade Stainless Steel as standard. Helping resist long term corrosion and keeping your doors and windows looking better for longer.

FINISH

We include an additional finishing process during manufacture to create a consistent finish and quality feel.

COMPREHENSIVE RANGE

A full suited range of quality hardware across your doors and windows.

VALUE FOR MONEY

Excellent lifetime value, providing you with quality you can afford.

LIFETIME GUARANTEE

Guaranteed to last as long as the door or window the hardware is fitted to. Providing peace of mind for you and the homeowner.

The BLU® brand range is owned, manufactured and sold by:

COASTAL

Shaping the future.

www.coastal-group.com

The benefits of using 316 Marine Grade Stainless Steel

Where corrosion levels are high, such as coastal environments and in acidic timber, commonly used metals such as zinc and 304 stainless steel are not able to stand up to the elements and corrosion can quickly start.

However there are many corrosive elements in the atmosphere wherever your doors and windows are, situated on the coast or in a city.

316 Marine Grade Stainless Steel is stronger and has higher levels of corrosion resistance than 304 Stainless Steel. That is why we use 316 Marine Grade Stainless Steel as standard on all BLU® products.

So wherever your doors and windows are installed, by fitting BLU® hardware you can have peace of mind your hardware will last at least as long as your doors and windows.

BLU® Hardware is designed to enhance the aesthetics and performance of your doors and windows. The range is made from 316 Marine Grade Stainless Steel to provide the best protection from corrosion, and help your doors and windows to look and perform better for longer.

To meet market demands for both classic and contemporary styles, we've taken our 316 Marine Grade Stainless Steel hardware and added a PVD Coating to create some new and very special finishes.

What is PVD Coating?

PVD stands for Physical Vapour Deposition. Also known as 'thin-film' coating, PVD coating is a process in which the hardware is placed inside a vacuum chamber and given a negative charge, a solid material (the coating) is then vapourised in this vacuum and given a positive charge forcing it to deposit atom by atom onto the surface of the hardware.

The coating is not simply layers of metal, the material is deposited atom by atom providing an ultra-thin, highly accurate and extremely strong coating. It also provides a much more uniform appearance and finish than traditional coating methods.

As the coating is very thin it enables the texture of the underlying metal to still be visible and felt. So for a satin finished product we use a base material of satin stainless steel and apply the PVD coating to it.

The Benefits of PVD Coating

- The PVD process increases the longevity and durability of the hardware, making it more resistant to wear, weather and corrosion.
- The PVD coating does not fade, discolour or tarnish and isn't affected as much by UV rays.
- The PVD coating process is more sustainable and environmentally friendly than traditional coating methods. No harmful gases or other substances are released and there is no waste during the coating process.
- The PVD process does not affect the recycling value of the stainless steel base material.

Our finishes include:

- Satin Stainless Steel – raw 316 Marine Grade Stainless Steel with an extra finishing process applied
- Polished Stainless Steel – raw 316 Marine Grade Stainless Steel polished to a perfect mirror finish
- PVD Stainless Satin Brass – 316 Marine Grade Satin Stainless Steel with a PVD Brass coating applied
- PVD Stainless Polished Brass – 316 Marine Grade Polished Stainless Steel with a PVD Brass coating applied
- Black – dual coating paint system incorporating an automotive lacquer for enhanced longevity (MBL)

BLU® 316 Marine Grade Stainless Steel

SATIN STAINLESS STEEL FINISH

Raw 316 Marine Grade Stainless Steel with an extra fine finishing processes applied to give it our unique 'super-satin' silky finish.

Suits classic styles just as much as the modern contemporary look.
