## From The Anvil

### *About Us*

At From The Anvil, we specialise in the manufacture and distribution of premium quality ironmongery, lighting and homeware, with over twenty three years of experience mixing modern technology and hot forging with traditional anvil hammer work to produce the largest selection of traditional handmade ironmongery in the UK. Our skilled Blacksmiths use quality base materials such as mild steel, solid Bronze and Brass, alongside marine grade 316 Stainless Steel to produce exceptional quality products.

We're a family-owned business based in Powys, Mid Wales. Our broad site houses a large showroom, offices, warehouses, workshops, a manufacturing & finishing plant, and our design & marketing hub. Our extensive setup enables us to hold impressive stock levels, allowing us to offer swift delivery times and fulfil the needs of a wide-ranging client base. From The Anvil products are sold through a network of registered retailers either through shops, showrooms, trade counters or via their own websites.

We offer a comprehensive range of traditional and contemporary product types, styles, & finishes, covering all interior aspects to give you a choice of beautiful products to enhance and complement your homes, offering consistency throughout. Our range comprises over five thousand unique product lines, and for any special product requirements that we don't already cover, we have a bespoke manufacturing and finishing team who are happy to discuss individual requirements.

We're passionate about the products we produce and offering premium service and aftersales care to our customers; We offer a wealth of product information including technical support, technical drawings, fitting guides, comprehensive imagery, videos, care & maintenance advice, and much more. We continue to focus on high-quality manufacturing which allows us to produce beautiful, functional products, honed to the highest specifications and unsurpassed by others.

## Introduction

### *The Ironmongery Journey*

Overall, a successful build or renovation project is a harmonised accumulation of many small details. Choose the correct materials, colours, fixtures and fittings along the way and you'll achieve your desired vision.

With so many decisions to make, ironmongery can often get overlooked. But it's an important decision and should be considered every step of the way, and at every stage during the process. It can transform the overall look, feel and function of a property. The quality of windows, doors and kitchens is obviously important, but the ironmongery, and colour choice is arguably more important and perhaps has more of a visual impact.

A large percentage of people who undertake a renovation or build project don't realise that ironmongery is something that you can order separately. You don't have to go with the standard options offered by the door, window or kitchen manufacturers. Although ironmongery can be retro fitted it's always better to plan ahead, and work with your suppliers to ensure that you achieve your desired look.

This brochure outlines the decision journey in terms of ironmongery, but the journey is flexible and can be carried out in a different order if required. The sequence is based on a usual project timeline, starting from the outside and working in; designed to help guide you through each stage of the process whilst offering options for coordination and consistency throughout your home. As well as ironmongery we also have utilised our expertise in metal work to manufacture an attractive range of lighting and homeware which is also highlighted in our brochure.

## Stage 1.

### *Windows & External Doors*

When carrying out a new build or extension project, external windows and doors must be ordered several weeks in advance to fill the planned reveals or gaps left between the bricks or timber frame. At the point of ordering these windows and doors, something that many people are unaware of, yet is important to consider is that any accompanying ironmongery can be chosen, so don't be restricted by the sometimes limited choice offered by the manufacturer.

Window and external door ironmongery can also be retrofitted to replace original ironmongery at any stage of a home build or renovation project. Alongside paint, this can give your doors and windows a completely new look and sometimes saves the expensive process of full replacement.

- *You don't have to settle for the choices offered by the manufacturers.*
- *Retrofit ironmongery at any time to cost effectively transform your joinery.*
- *Choose a design and finish that will match throughout.*

## Stage 2.

### *Internal Doors*

Internal doors can be made to order or purchased as standard off the shelf items. As with external windows and doors, the ironmongery, paint or stain used can completely transform the look of your interior spaces.

The door lever handle, latch or knob is usually the centre piece, but it's also important to think about matching accessories such as butt hinges, door stops, and bathroom turns. Usually ordered at the same time, cupboard and sliding doors should also match the overall look of any internal doors and our vast collection of ironmongery enables this.

- *You don't have to settle for the choices offered by the manufacturers.*
- *Choose a finish that can be used for all door types and accessories.*
- *Colour and ironmongery can have a big visual impact.*

### Stage 3.

## *Kitchens & Cabinetry*

Like external doors and windows, kitchens are usually ordered several weeks in advance to fitting. Again, any range of ironmongery can be ordered and fitted on your kitchen so don't be limited by the manufacturer's choice. Kitchen hardware makes a big visual, and functional impact so the kitchen overall should be considered carefully.

Kitchen ironmongery can also be retrofitted replacing old hardware at any stage. Alongside a new coat of paint this can give your kitchen a completely new look and sometimes saves the expensive process of full replacement.

- *You don't have to settle for the choices offered by the manufacturers.*
- *Retrofit ironmongery at any time to cost effectively transform your joinery.*
- *Use a design and finish consistent with that on your doors and windows.*

### Stage 4.

## *Ancillaries & Accessories*

Practical items such as curtain poles, shelf brackets, hooks and door stops should be aesthetically pleasing and of good quality too. Choose these items in a similar style and finish to elevate your interior and create continuity throughout.

Items such as hooks and shelf brackets can be fitted at any stage and are a great way of organising your home whilst adding character and a feeling of overall quality.

- *Choose a finish that can be used throughout.*
- *Functional designs and in keeping with your overall look.*
- *Experiment with multifunctional uses for a touch of fun.*

## Stage 5.

### *Lighting*

Lighting is a fine balance between form and function, therefore should also be given careful consideration from the very early stages in any home renovation or build project. From feature pendants to spotlights, and wall lights to lamps, lighting design and location can have a big impact on the look and feel of any space.

Choose styles that are aesthetically pleasing and suit the functional requirements of your home, in colours and finishes that complement your interior style and decor.

- *Carefully consider the style and location of your lighting for maximum impact.*
- *Update lighting to breathe new life into any space.*
- *Experiment with mixed styles, colours and finishes to add interest.*

## Stage 6.

### *Home & Garden*

The final stage, and arguably the most fun; adding the finishing touches to elevate your space. Invest in timeless, premium quality home & garden accessories that have been manufactured with meticulous attention to detail and made to last for years to come.

Also think about periodically updating your home accessories to transform the feel and functionality of any space inside, and outside your home. For a high-end look, coordinate the styles and finishes with those already in and around your property.

- *Choose timeless, premium quality accessories that are equally beautiful and functional.*
- *Update your home & garden accessories to refresh your space.*
- *Coordinate your ironmongery and homeware finishes for a high-end look.*

# Available Finishes

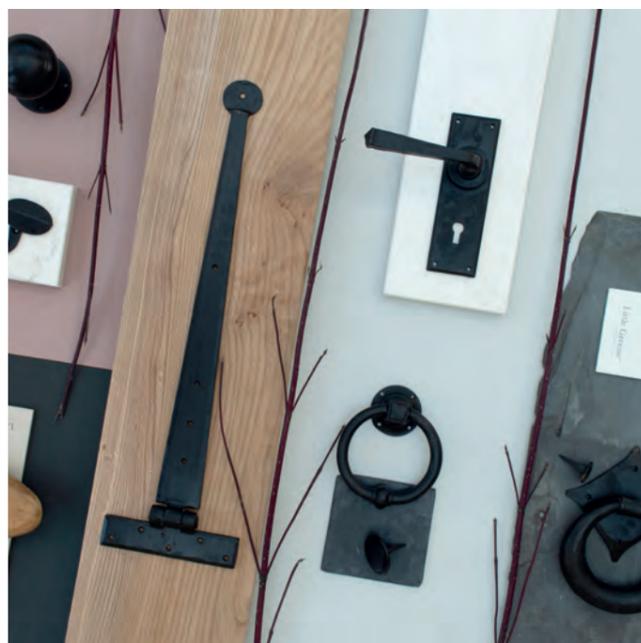

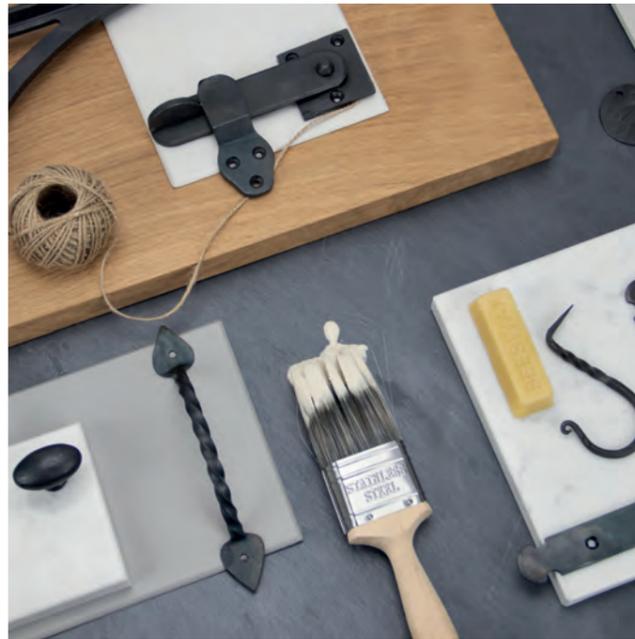

It's important to consider your ironmongery finish and design at an early stage so you can finish-match throughout your project. Most of our products are available in all finishes, giving you flexibility and choice. Our specialist finishes have been carefully developed and refined over many years and many are completely unique to us.

## Beeswax

FOR INTERNAL USE ONLY

Our Beeswax finish is the most authentic finish for steel. After forging, the colours left in the steel range from blue to deep red ochre. To preserve these beautiful colours, our Beeswax products are dipped into hot beeswax. This gives a subtle, matt richness to the metal and offers excellent protection when the products are fitted internally and properly maintained. An extremely natural finish and a far softer alternative to a black powder coated finish.

## External Beeswax

FOR INTERNAL & EXTERNAL USE

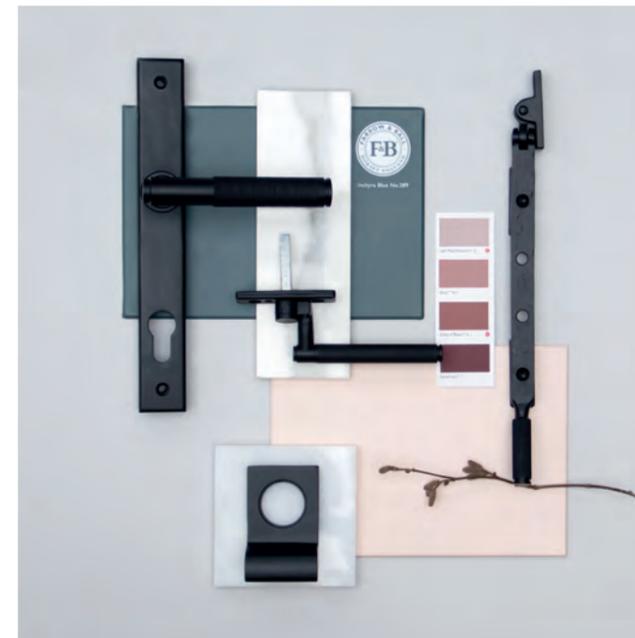

Our External Beeswax is unique to From the Anvil and is manufactured from an anti-corrosive beeswax. It has a matt richness and like our standard Beeswax, the depth of colour ranges from blue to deep red ochre. An extremely natural finish and a far softer alternative to a black powder coated finish.

## Black

FOR INTERNAL & EXTERNAL USE

Our Black finish is a popular choice in traditional settings, it has a subtle sheen and offers a bold contrast on both stained and painted timber alike. It is baked in a high-temperature oven giving it durable corrosion resistant properties. This finish is extremely low maintenance and perfect for use in bathrooms, kitchens or externally where damper environmental conditions are expected.

## Matt Black

FOR INTERNAL & EXTERNAL USE

Our refined Matt Black finish has a distinct contemporary feel. Naturally, it looks great in ultra-modern interiors, but this versatile finish is timeless and will create a sophisticated statement in traditional or more rustic settings too. The Matt Black finish is applied to a base material of solid steel and then baked in a high temperature oven, resulting in a subtle black patina that emphasises the product's clean silhouette.

More finish information including complementary colours and maintenance advice can be found on our website.

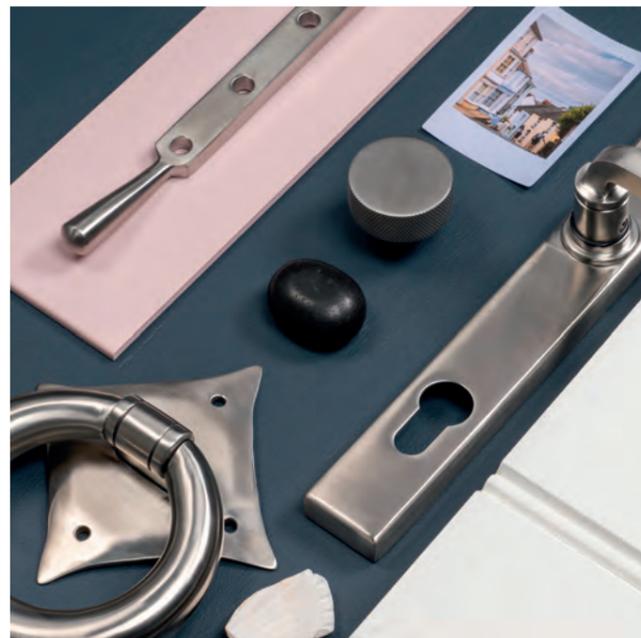

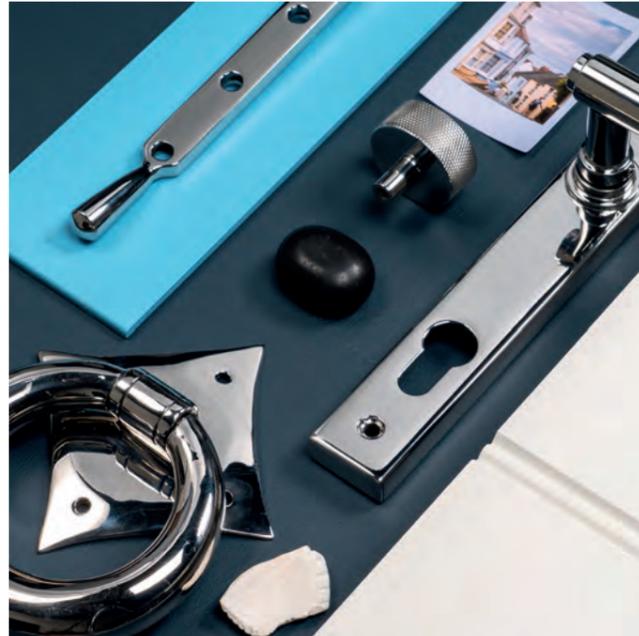

Our Marine Grade 316 Stainless Steel products have excellent anti-corrosion properties which makes them perfect for use in salt-rich coastal areas, and they are rigorously tested for such harsh environmental conditions. Find out more about this finish, and how unique our hand-forged 316SS products are in our blog:

*Polished  
Marine SS (316)*  
FOR INTERNAL & EXTERNAL USE

Our Polished Marine Stainless Steel is grade 316 and manufactured with high concentrations of chromium and nickel. This finish has extremely resilient corrosion resistant properties, exceeding 1000+ hours salt testing. An excellent choice for coastal locations or polluted environments, where a high sheen look is desired.

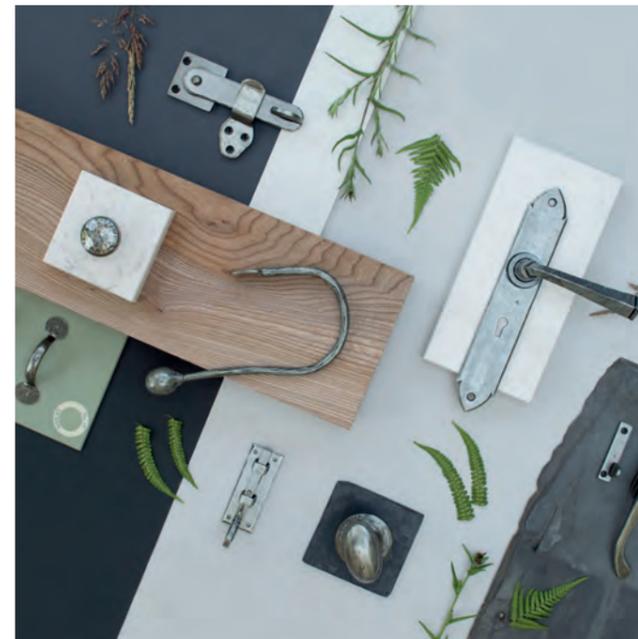

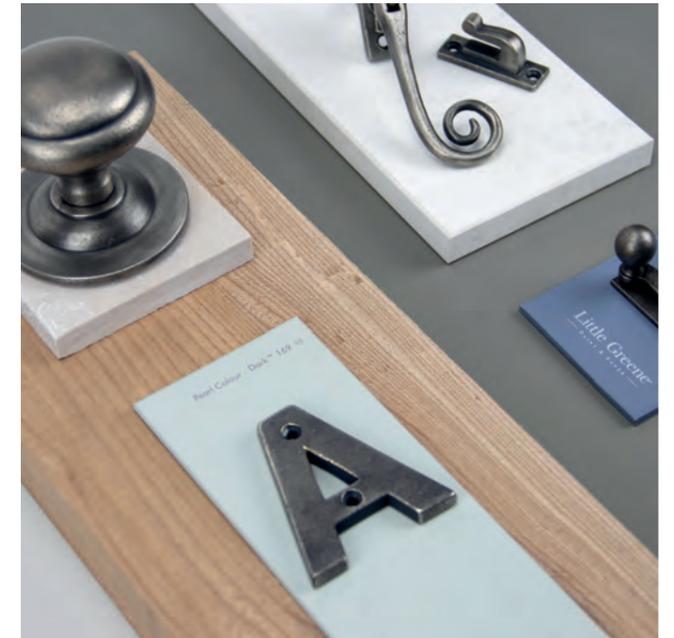

*Satin  
Marine SS (316)*  
FOR INTERNAL & EXTERNAL USE

Our Satin Marine Stainless Steel is grade 316 and manufactured with high concentrations of chromium and nickel. This finish has extremely resilient corrosion resistant properties, exceeding 1000+ hours salt testing. An excellent choice for coastal locations or polluted environments, where a low sheen, matt look is desired.

*Antique Pewter*  
FOR INTERNAL & EXTERNAL USE

The Antique Pewter finish is the result of a complex process applied to solid brass, offering an attractive alternative to Pewter Patina. As this finish is applied to brass rather than steel, it has fewer textural marks making it smoother than our Pewter Patina finish.

*Pewter Patina*  
FOR INTERNAL & EXTERNAL USE

Our Pewter Patina finish is forged from a durable base of steel and is a fine example of how our unique manufacturing techniques add further detail to the natural charm of metals. The process by which the contrasting textures of this finish are created results in a rich appearance that sits well in characterful, rustic homes, but also offers a contemporary alternative in more modern settings.

*We recommend periodically oiling any moving parts on all products to ensure they perform to their full capacity, especially when fitting externally. We would also strongly advise that this is carried out upon initial installation.*

*All of our brass products are made from solid brass with some being lacquered and others being unlacquered. When brass is unlacquered it will age and create a patina through oxidisation and elemental effects. This ageing and patina can be polished back to create a sheen similar to the original finish.*

### *Polished Brass*

FOR INTERNAL & EXTERNAL USE

Made from solid unlacquered brass, this finish is both classic and simplistic and offers great possibilities for stately and period dwellings alike, particularly where a very traditional look is desired. When fully polished this finish has a depth of reflection. However, as our Polished Brass is unlacquered, it will naturally age and tarnish through oxidisation, giving the product added character.

### *Aged Brass*

FOR INTERNAL & EXTERNAL USE

Our Aged Brass products are made from solid unlacquered brass, offering an abundance of character and charm. This finish is perfectly suited to period dwellings and will create a statement throughout. Due to the accelerated ageing process this finish undergoes, a darker patina gathers around the edges and recesses to contrast beautifully with the re-polished surface areas.

### *Satin Brass*

FOR INTERNAL & EXTERNAL USE

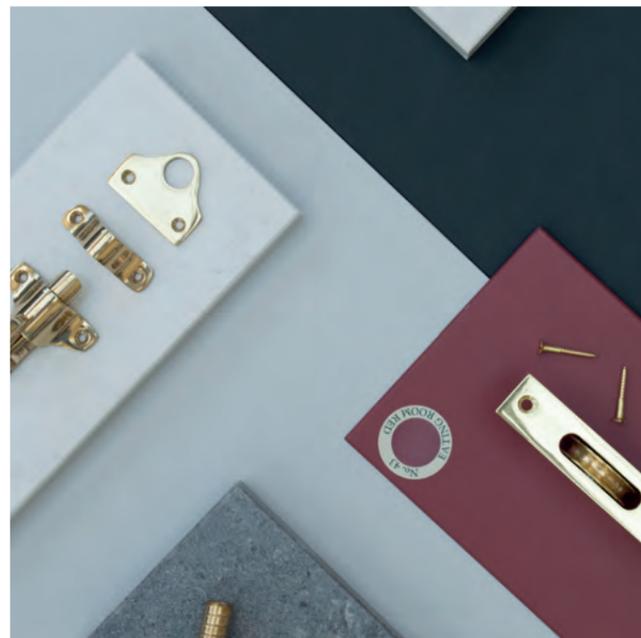

Our Satin Brass products are made from solid brass. During the final stages of manufacturing they are brushed with a satin wheel to give a distinctive appearance. A high-quality matt lacquer is then applied to their surface for protection. Satin Brass brings a sense of sophistication and offers a more contemporary alternative to Polished Brass. The rich, warm undertones of this finish exude luxury and are sure to create a statement in any space.

### *Lacquered Brass*

FOR INTERNAL & EXTERNAL USE

Made from a solid brass base material with a quality lacquer applied to its surface. This finish is designed to avoid discolouration and oxidisation, making it a great choice if low maintenance is desired. We recommend avoiding the use of any chemicals or cleaning products on this finish to prevent a breakdown of the lacquered top-coat.

*More finish information including complementary colours and maintenance advice can be found on our website.*

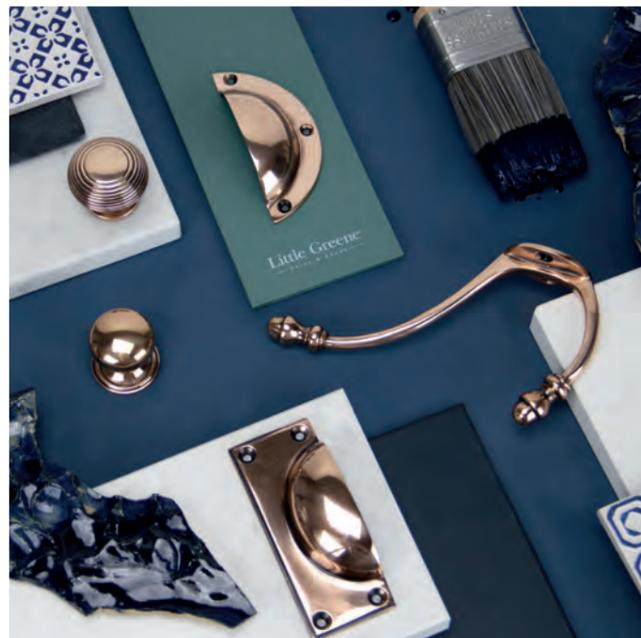

*Our products have excellent anti-corrosive properties when maintained to specific requirements for each finish and will last many years if given just a little regular care.*

### *Aged Bronze*

FOR INTERNAL & EXTERNAL USE

Our Aged Bronze products are manufactured from solid bronze containing a minimum of 85% copper. Due to the process used to age the metal, this finish is very dark and has a rich, matt appearance. During the final stages of manufacturing, we apply a durable, matt lacquer to this finish which helps preserve its distinctive tones.

### *Polished Bronze*

FOR INTERNAL & EXTERNAL USE

Manufactured from solid bronze containing a minimum of 85% copper. This finish is firstly aged and then re-polished, which creates a subtle contrast between the lighter surface areas and the darker detailed areas of each product. To preserve the bright contrast of this finish, we apply a robust lacquer at the final stages of manufacturing. A perfect choice for both contemporary and traditional settings.

### *Polished Chrome*

FOR INTERNAL & EXTERNAL USE

Our Polished Chrome products are made from a base metal of solid brass with a high-quality chrome plating applied to the surface. A high sheen finish that is most commonly used in contemporary settings. This finish offers bright, bold and reflective qualities which work best if a clean, cool look is desired.

### *Satin Chrome*

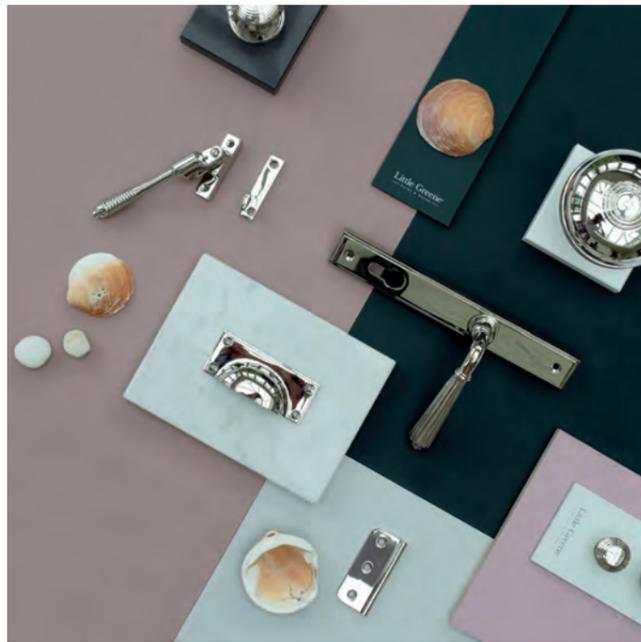

FOR INTERNAL & EXTERNAL USE

Our Satin Chrome products are created from a base metal of solid brass with a quality chrome plating applied to its surface. Satin Chrome offers an understated alternative to Polished Chrome. Its blue traces and less reflective appearance make this finish popular with those who wish to select a matt finish.

*To help you maintain your chosen finish, our website includes specific maintenance and care guides tailored to each finish within our range, this will ensure your products last for many years to come!*

**Polished Nickel**  
FOR INTERNAL & EXTERNAL USE

Our Polished Nickel finish is a high-quality plating applied to solid brass. This finish is bright, reflective and extremely versatile. It is very well suited to modern properties but equally matched to traditional settings due to the warm, calm tones. As our Nickel finish is made using only one plating on brass, it offers a subtle warmth that cannot be replicated by more modern chrome finishes.

**Natural Smooth**  
FOR INTERNAL USE ONLY

Our Natural Smooth products are made from a natural cast iron and finished with a clear matt lacquer. This produces a beautifully smooth look and offers a simplistic charm with versatile attributes, making it suitable for both traditional and contemporary settings.

**Iron**  
FOR INTERNAL & EXTERNAL USE

Made from solid iron, this finish highlights the natural beauty and texture of the metal. It is cast and finished with a clear powder coating to protect the iron from weather and moisture, this also gives it a rich depth and subtle sheen.

**Ebony**  
FOR INTERNAL & EXTERNAL USE

An ebonised finish made from rosewood timber. Favoured for its rich dark tones, this finish is a popular choice in traditional properties and often used to complement rim locks or to create a statement on internal doors. When paired with Brass it accentuates the traditional look and when used with Nickel or Chrome it creates a more contemporary feel.

**PVD Brass**  
FOR INTERNAL & EXTERNAL USE

Our Physical Vapour Deposition (PVD) Brass products are crafted from stainless steel and designed to prevent discolouration and oxidation. An ideal choice for those desiring a low maintenance finish.

**Rosewood**  
FOR INTERNAL & EXTERNAL USE

Made from high quality rosewood timber and waxed to enhance and protect its rich red hue and characterful veining. A popular choice in traditional properties where it is often used to complement rim locks. When paired with Brass it accentuates the traditional look and when used with Nickel or Chrome it creates a more contemporary feel.

Please avoid using any form of chemical cleaner, e.g. oxalic acid or aerosol sprays to clean products, as this can permanently damage any finish. Only use our recommended products to clean, oil and maintain the life of your product.

## *The Journey Window Furniture*

Before deciding on the finish and style of window furniture, first you must determine the type of window you have and therefore the right choice of ironmongery needed for that window type.

In this section you can find out about each window handle type and select your preferred product from our comprehensive collection. Once you have selected your window handles, you can match your chosen finish and design to external and internal door furniture too, creating a cohesive look throughout.

<i>Espagnolette Fasteners</i>	<i>26-33</i>
<i>Casement Window Fasteners</i>	<i>34-39</i>
<i>Window Stays</i>	<i>40-48</i>
<i>Fanlight Furniture</i>	<i>49-50</i>
<i>Sash Furniture</i>	<i>51-59</i>

*More product information including dimensions, finish and fitting advice can be found on our website.*

# Espagnolette Fasteners

Multipoint locking systems are usually fitted in UPVC or modern timber and aluminium windows for added security. This locking system requires an espagnolette handle as the spindle drives the multipoint lock which usually secures the window at three points within the frame. The window can then be locked by turning the handle's grub screw. Window stays are an added option when using espagnolette handles as they are not required to secure the window when closed.

# Casement Window Fasteners

Window fasteners are suitable for use on more traditional windows that don't have an internal locking mechanism. Most fasteners are kept in place with a mortice plate that is recessed into the window frame and are partnered with matching window stays. Windows with a central mullion use a fastener and hook plate, and fasteners that have a night venting facility use a wedge plate to allow the window to be held open. Some window fasteners are lockable by tightening the grub screw which holds the fastener in a closed position. Security can be added to windows without a locking fastener by using window bolts or locking stay pins.

# Window Stays

Window stays are used alongside window fasteners. A stay is an arm with evenly spaced holes that slot over pins to hold the window in an open position when required. When closed the stay slots on to the pins to secure the window shut. These can be fitted with locking stay pins if additional security is desired.

## Fanlight Window Furniture

Fanlight windows were traditionally designed to sit higher than standard windows to allow more natural light to flood interior spaces, with decorative detail to cast intricate shadows. Now also available in more modern minimalistic shapes and sizes, our collection of furniture comprises of all the essentials for your fanlights whatever the style.

## Sash Window Furniture

Recognised for their decorative quality, sash windows consist of two panels that slide up and down allowing the window to be opened and closed from both the top and the bottom. A Sash fastener is required to secure the top and bottom sashes or panels together on what is called the mid-rail. Sash lifts are fitted to the bottom of a sash window, usually in pairs and are used to assist in the lifting and closing of the bottom sash. Our extensive range of furniture for sash windows also includes sash eyes as an alternative to pulls, and our range of products is designed to match other ironmongery within your home.

Our vast collection of sash products can be used for a variety of properties from country cottages to town houses to period dwellings. See the full range here:

*Sash windows are traditionally found in Victorian & Georgian properties and are increasingly being refurbished with modern materials to make them more energy efficient. Our collection of sash window ironmongery has increased and evolved to meet the needs of today's market.*

# The Journey Door Furniture

The front door has such an impact; it is so important to choose a door style and accompanying furniture to suit your property. Much like your windows, before deciding on the finish and style of external door furniture, you must first determine the type of doors you have and therefore the right ironmongery required for that door, and lock type. Most exterior doors, certainly front and back must be lockable to protect your home.

Similarly, the ironmongery requirements for your internal doors will vary based on the location of the door within your property, for example a bathroom door may require a locking mechanism along with a lever handle to provide privacy, whereas you might opt for a sliding or pocket door in a room where space is more limited.

In this section you can find more information about the different types of door furniture, enabling you to confidently determine the type you require before moving on to choose the preferred finish and style to carry throughout your home.

<i>Centre Door Knobs</i>	<i>62-66</i>	<i>Mortice/Rim Knobs</i>	<i>109-115</i>

# Centre Door Knobs

Our refined collection of centre door knobs provides statement pieces for all applications. From charming country cottages to modern and minimalistic new builds, this range is as functional as it is fabulous.

Centre door knobs are used as a decorative single knob, usually fitted to the middle of the door and accompanied by an escutcheon.

## Door Knockers

Our extensive collection of door knockers includes traditional, and more contemporary designs across a number of our most popular finishes, offering something to suit a wide variety of doors. We offer options to suit narrower doors with glazing or panels, where there is typically less space to fit door furniture, as well as larger backplate options designed to make a statement on larger, more traditional front doors.

Our vast collection of door knockers can be used for a variety of properties from country cottages to town houses to period dwellings. See the full range here:

## Espagnolette Door Handles

Espagnolette handles are used in conjunction with a multipoint locking device which is mounted on the vertical frame of an external door or window. The locking mechanism is operated via a spindle connected to a pair of espagnolette handles which drives the multipoint lock and usually secures the door at several points within the frame. We offer a vast range of traditional and more contemporary designs in our espagnolette handles across our entire range of finishes, enabling coordination with your ironmongery from the outside in, and then throughout your home.

*Espagnolette Door Handles require a multipoint lock to function. When paired together they provide elegance, security and practicality.*

*Mortice & Mortice/Rim Knob Sets*

Mortice & Mortice/Rim Knobs are fitted to the surface of a door, they ooze charm and character and are often found in period properties. Our heavy mortice/rim knob sets are available in a huge choice of designs and finishes. Many of our period door knobs are based on original Victorian designs and are perfect for an authentic restoration project or adding a touch of timeless design to a more contemporary interior. Our mortice knob sets have a fixed rose and can only be fitted with a mortice latch, whereas our mortice/rim knob sets have loose roses meaning they can either be used with a mortice latch or fitted with a rim lock.

*Knob sets are used in all types and periods of property and therefore the right choice has a huge impact when designing and styling your home. See the full range here:*

*It can be difficult to visualise how products will look against certain textures and colours around your home so we like to create mood boards to give you a feel for the possibilities.*

*We have created mood board ideas for each of our finishes on the website to inspire you and show off colour combinations that we think work really well. Try creating your own mood board in your home to see what suits the environment.*

# Thumblatches & Latches

Still a popular choice today, thumblatches are one of the most evocative pieces of ironmongery available and are ideal for creating an authentic feel in any interior. Thumblatches are decorative door latches with a thumb shaped lever. When this is pressed, it operates the thumb bar that passes through the door, which in turn lifts the latch on the opposite side, causing the door to open. Typically used on ledged and braced doors they are perfectly paired with our collection of T Hinges.

*N.B Some finishes may differ from the image in this brochure. Please refer to our website for individual product information and images.*

*Thumblatches are one of the most traditional products in our range and we recommend following our fitting guide video to make sure it all works perfectly.*

*Our Blacksmith thumblatches are hammered into shape from mild steel using a traditional anvil and fire manufacturing method. Thumblatches are typically used in conjunction with a T hinge on traditional plank doors.*

## Hinges

Our comprehensive hinge collection covers all requirements; our butt hinges come in a wide selection of sizes and finishes for hanging anything from a kitchen cupboard, to your doors and windows. The collection also includes decorative and specialist hinges such as butterfly, HL and H hinges; perfect for creating an authentic look.

In this collection we also offer a selection of T Hinges as an alternative to a butt hinge. T Hinges are typically used in conjunction with a Suffolk Latch on traditional plank doors which are slimmer than solid/ panelled doors and therefore can't be fitted with a typical latch or lock. Our range of traditional T Hinges can be used on anything from an under stair cupboard, to a garden gate.

*The latches and privacy latches in our range are designed for access only from one side of a door i.e. cupboards and window shutters etc.*

*With a vast array of hinge types and therefore uses available we can advise on which is best suited for the job at hand. See the full range here:*

*We have an extensive range of products for sliding and pocket doors including ironmongery, locks and hardware kits.*

*We love to show off our products in customers' homes and have many case studies featuring our range on our website. If you have a home you want to show off then please get in touch as we'd love to see it.*

# *The Journey Kitchens & Cabinetry*

Our range of cabinet furniture caters for all property types, whether they be traditional, contemporary, or somewhere in between. Often, traditional kitchens are fitted with revealed hinges and cupboard knobs, whereas more contemporary kitchens are suited to cup pulls, bar handles or edge pulls. Our entire cabinet furniture range can be matched to your existing furnishings to provide continuity throughout your home.

<i>Cabinet Knobs</i>	<i>140-156</i>
<i>Cabinet Pull Handles</i>	<i>157-167</i>
<i>Drawer &amp; Edge Pulls</i>	<i>168-172</i>
<i>Cabinet Hinges &amp; Latches</i>	<i>173-175</i>

*More product information including dimensions, finish and fitting advice can be found on our website.*

# Cabinet Knobs

Our extensive collection of cabinet knobs can be used in many ways. Whether you are refurbishing furniture, fitting wardrobes or installing a new kitchen, our choice of ironmongery will add the perfect finishing touch. We offer a vast choice of styles and finishes, including hand forged products that sit well in rustic country homes, timeless period designs as well as clean, contemporary styles for more modern settings.

## Cabinet Pull Handles

We manufacture pull handles in a huge variety of styles and sizes for use on kitchens, wardrobes or doors. Our signature gothic and bean pull handles are forged from a single piece of steel and are at home in any barn conversion or country cottage. If you are looking for something suitable for a modern setting, we also offer six new contemporary options all designed to tie in with our existing product families, all available in a range of our most popular finishes.

*Cabinet pull handles are an easy way to create a style in your home. By choosing Bean or Gothic D handles it creates a more traditional look and by choosing the Brompton range a more contemporary feel can be achieved.*

# Drawer & Edge Pulls

Our drawer pulls come in many finishes and cater for any look. Choose our concealed pulls for use in modern interiors or opt for face fixed pulls if a more traditional look is desired. Pair with our cabinet knobs for a cohesive look.

Our contemporary range of edge pulls are ideal if you're looking for an ergonomic yet minimalistic solution for your kitchen or cabinetry. These discreet handles sit on the top edge of a door or drawer enabling you to open and close with ease whilst maintaining a clean and contemporary look.

# Escutcheons

Designed to complement all of our mortice knob and lever on rose designs, our vast range of escutcheons are used to decorate key holes, adding the finishing touch to any locking door.

Use our standard escutcheons for sash locks, or for modern euro cylinder locks, opt for our euro escutcheons.

*Choosing the right finish of ironmongery for your front door is just as important a decision as the style and colour of door. Making the right choice for your property type is essential.*

## Euro & Rim Cylinder Pulls

Our door pulls are used to pull or push entrance doors into an open or closed position. Our range offers a variety of styles and finishes designed to work with euro and rim cylinder locks, whilst tying in with the rest of your door furniture, offering a stylish and cohesive look.

*For a simple front door design all you essentially need is a locking pull, whether it be the traditional rim cylinder or the more modern euro pull. See them all here:*

# Thumbturns

Our thumbturn collection offers an added feature to any door when privacy is required; a perfect solution for bathroom doors. We have designed a broad selection of styles and finishes to complement our range of mortice knob sets and lever on rose handles. Our thumbturns can also work as a standalone feature on any door.

## Brackets

Our traditional shelf, handrail and mending brackets are designed to be useful whilst still looking great. Use our shelf brackets to create feature open shelving, and our handrail brackets to add character to timber staircases. Our mending brackets are suited to traditional doors or windows that require added strength as well as decorative form.

*Our shelf brackets are ideal for feature shelving in any area around your home, from above kitchen worktops, entrance ways and utility rooms to bedrooms and bathrooms, with styles to match many design choices.*

## Curtain Furniture

Our striking curtain furniture is both practical and beautiful. Skilfully forged by hand from solid steel, it exudes character and charm. We offer eight elegant finial designs in subtle beeswax, shimmering pewter or glossy black.

*Curtain furniture can often be left until last when decorating a room but is always an integral part of any design. Match your finishes here to the ironmongery choices throughout your home.*

*You can also match your curtain ironmongery to the window handles and stays, to the door handles and also the cabinet furniture all in the same room.*

# Lighting Collection

Our elegant collection of ceiling pendants, wall lights and cluster pendants are a simple solution for illuminating and elevating your space.

Available in a wide selection of colours and finishes, our lighting is hand-spun from raw materials and each product is made to order. Due to the bespoke nature of these products we are also able to offer custom colours and finishes upon request.

See our full lighting collection including all finish and colour options, dimensions and technical information on our website.

All designs of light are available in our natural metal bases of **Copper, Nickel & Brass** with the additional **Aged Brass** finish also available to choose from.

## The Brindley Pendant

Our Brindley pendants are as eye-catching as they are versatile. Can be hung at various different levels to brighten up a space, and looks fantastic when paired with matching pendants.

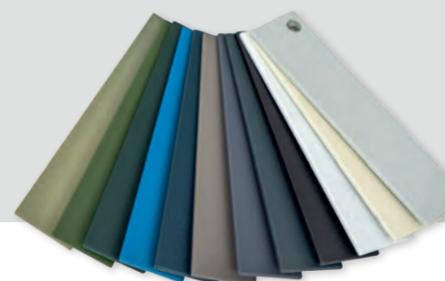

All of the pendant shapes are available in our select 12 colours representing elements of nature and a further 8 bare metal finishes to suit all styles. See the full range on our website:

## The Harborne Pendant

Our Harborne pendants embody classic British design. Their rounded edges and unique shape will create an eye-catching focal point in any room.

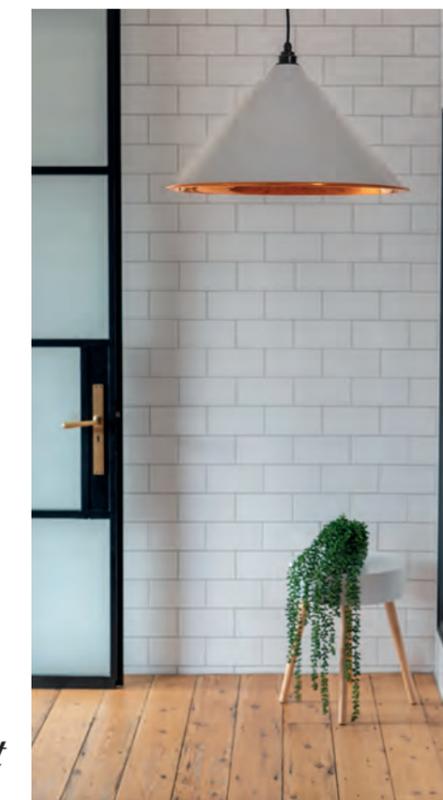

Each of the three base metals of **Copper, Nickel & Brass** can also have an outer finish in any one of our range of **12 natural colours**.

## The Hockley Pendant

Our Hockley pendants have a sleek silhouette that brings drama to any space. They look fantastic individually, or can be combined to create further interest.

### The Frankley Pendant

With their sleek, contemporary design, our Frankley pendants are sure to create an eye-catching statement in any interior. Hang individually or in a group to completely transform your space.

All of the cluster pendants are available in the full colour range and our eight signature metal finishes. See the full range on our website:

### Cluster Pendants

Available in our signature Brindley and delicate Flora designs, our cluster pendants are as eye-catching as they are versatile, and look fantastic when paired with matching wall lights.

### The Flora Pendant

Inspired by nature, our Flora pendants feature delicate curves which disperse beams of light to create a warm, soft ambience. Pair with our matching Flora wall lights and plant pots to complete the look.

### Wall Lights

Pair our Brindley and Flora wall lights with matching pendants to create a striking feature in any room. Our signature Brindley and delicate Flora offer a same style, smaller version to the pendants, and are available in all the same colour and metal finishes.

# Home & Garden Collection

Attention to detail and exceptional craftsmanship were at the forefront of our minds when developing this range of Home & Garden products, designed to enhance and complement customer homes, whilst offering consistency with existing hardware used from our other product collections.

The artisanal nature of these designs means no two items are identical. However, each one offers the same durability and elegance that's expected from our products so you can enjoy them for years to come.

We offer a vast range of Home & Garden products to suit all types of properties and gardens. See the full range on our website:

## Fireside Accessories

Our stylish collection of log holders are designed to keep your firewood organised, accessible, and beautifully displayed.

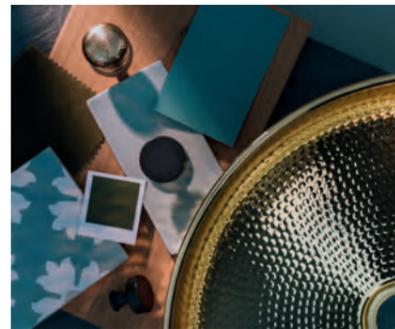

Pair with our carefully curated collection of companion sets to enhance your fireplace experience while adding an elegant touch to your living space.

## Vases & Plant Pots

Our elegant flowerpots are the perfect home for your plants both indoors and outdoors. From the elegant Flora to the contemporary Hepworth and Newlyn, our pots are available in a selection of our most popular finishes.

### Sinks

Add a touch of sophistication to your space with our stunning collection of Smooth and Hammered sinks. Hand-spun from solid Brass or Copper, these sinks are as beautiful as they are durable.

### Boot Racks

Our practical range of boot racks are intended to keep your footwear organised and your floors clutter-free. Each piece is meticulously hand-crafted from a mild steel base material to create a sturdy yet tasteful storage solution.

We are always on the look out for properties using our products so if you feel like yours is 'the one' then get in touch with us. Scan the QR code to see all the case studies we have.
